

Thread size: 1" - 20 TPI
 Pitch diameter: 0.965" +/- 0.001"

*All dimensions
 +/-0.002 unless
 noted otherwise.

*** Instructions:

Install spring on barrel, then washer, and finally thread tuner on until it is flush with muzzle. Put a witness mark on barrel to keep track of tuner adjustments. Start at 0 and move up from there when tuning.

Shoot groups in increments of five on the tuner to find best settings. Look for two good consecutive settings, then put tuner in middle of two best setting for most stable results.

***USE ANTI-SEIZE
